

Agriculture Union Green Policy

The Agriculture Union is committed to protecting our environment by implementing environmentally-friendly office protocols.

“The Agriculture Union Green Program”

- Recycle all products possible entering the office
- Restrict the use of Styrofoam products
- Turn off equipment when it's not being used. This can reduce the energy used by 25 per cent; turning off the computers at the end of the day can save an additional 50 per cent
- Encourage communications by email, and read email messages onscreen to determine whether it's necessary to print them. If it's not, don't!
- Produce double-sided documents whenever possible.
- Only print and distribute information which can not be disseminated electronically
- Use a supply of paper with maximum available recycled content
- Instigate an ongoing search for "greener" products and services in the local community.
- Ensure Eco-friendly Cleaning Products be used in the office
- All e-mails from National Office to contain a reminder to think GREEN before printing
